

Build Tomorrow with Sustainable Coatings and Adhesives

95% Bio-based Content
4.5€ Million Funding
12 Partners
8 Countries

The SuperBark project is revolutionizing wood-based products with sustainable solutions. Our mission is to create safe and sustainable adhesives and coatings sourced from pine and spruce bark, which are major industrial side streams of the forest industry.

By harnessing advanced extraction technology, our international team of industry and research experts will develop, test, and validate adhesives and coatings with $\geq 95\%$ bio-based content. The results of SuperBark will help replace current harmful fossil-based solutions used in consumer products in industries such as furniture, construction, transport, and packaging.

The project is supported by the Circular Bio-based Europe Joint Undertaking and its members.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or CBE JU. Neither the European Union nor the CBE JU can be held responsible for them.
